BELGICAN RHAPSODY
Max Vandervorst
Technical specifications

- Show for all age groups
- Duration : 30 minutes
- Minimum space requirements : 2m x 3m, on level ground, preferably slightly elevated. Indoors, or outdoors in a not too noisy location.
- In case of rain, a shelter or fallback solution is required
- Seated audience
- Tour team : 2 persons
- Setting up: 30 mins - Dismantling : 10 mins

Sound:

Autonomous (battery-powered amp and pedal), but we use local power supply wherever possible (more ecological than batteries)

In case the show is part of a musical festival or another event with a high risk of acoustic promiscuity, or if it takes place in a large hall, we will reinforce the sound system frontally (amp, louspeakers and mixer), adapting the power output to the situation at hand.

Lighting: (indoors)

Small general lighting (front and back) focusing on the stage area.
If not feasible, we will use ambient lighting

Loading/unloading/transportation

For unloading, the access by van should not be too remote. Within the venue's perimeter, we will move the material with a hand truck or hand cart.
